To relate scoring “points” rather than “strokes” in this tournament, consider that under the modified Stableford system a player earns 2 points for a net par, thus in 18 holes at net par would result in 36 points.

In our tournament 13 players earned 36 or more points, which suggest they played under net par; and 7 players earned less than 36 points which suggest they played over net par. The average points earned by all players was 38. The highest score was 52 by two players, the lowest was 22.
